

>charlie<

makes Sushi!

Hello, I am >charlie<, an amazing animated cat. I will entertain you and your guests as 'chef de cuisine' in a spectacular way!

Where?

at the **restaurant**
at the **lounge**
at the **club**
at the **bar**
and at the **hotel**

How? My profession as a cat is entertainment, fun & treats. Let me enchant your guests with my cooking show and an unforgettable Sushi-Dinner.

You can admire me in my element **on a table, on a bar, at a counter and wall** or on the floor. I am talented in many ways and as a chef and a cat I am at home in many kitchens. As such, I can do a lot more than just sushi and can create **individual set meals** for you — from burgers to haute cuisine — simply talk to me!

After the show you can still enjoy the thrill of >living surface< — **it is possible to continue with our interactive world** — with many wonderful fish in a virtual aquarium, which respond to the activity of the guests or with abstract graphics and fascinating games.

my qualities:

- Let me bring your location to life with the unique gastronomical experience that I offer
- I am funny, amusing and clever — an adventure to attract your guests and to keep them coming back
- Who can offer an animated cat as a chef? — the word of mouth will spread around and bring masses of interested people

how I become alive:

- You can have me with all of the cool vertigo products
- My areas of application are tables, bars, counters and walls or floors
- With regard to installation I like it uncomplicated, compact and easy and I will not create a lot of work
- Put your personal stamp on me and create your set meal!
- I am available individually or as a twin pack with the interactive crew

Let me entertain you!
