pepino

interactive light

pepino is a magic and interactive lamp, forming the next level of lighting design.

The contents and objects projected through the lamp onto the table react to all the hand movements of the people at the table.

pepino comes with a great variety of content with fishes & aquariums, abstract graphics and games. It allows also space for your attractive and individual advertising.

You will generate also a higher recall value with the optional integration of a customer logo. pepino is available in two versions – for big and small projection surfaces – suitable for all installation situations.

Convince yourself of the diversity and profitable use at your site!

areas of application

design:

You will create atmosphere and scenery and upgrade your location with this ingenious and eye-catching light in

- all common areas at hotels, lounges, shops and medical practices
- the gastronomy and entertainment sector at bars, restaurants and clubs

entertainment:

pepino creates for you amazing and outstanding entertainment for young and old and imparts your information with exciting graphics and games for

- indoor playgrounds, amusement and water parks as well as museums and zoos
- all waiting areas in the healthcare sector or for children´s corners in trade

advertising:

pepino is the tool to gain reliable high recall effects on your advertising messages and as a public attraction raises awareness for

- trade fairs, events and promotions
- your point-of-sale and flagship stores
- bars, clubs, restaurants and shops

highlights:

- eye-catching interactive lighting design for your location!
- be the talk of the town – your unique selling point – for which your competitors will envy you!
- new every day – the great variety of effects allows a new design or new advertisement, which will impress your customers on a daily basis!

how it works:

- can be projected on tables, floors and bars
- two versions are available for any situation: pepino for small surfaces and tables up to 2 people, pepino XL for big surfaces and tables up to 4 people
- Plug & play: compact all-in-one device including all technical equipment required ready-to-work, just power connection needed
- mountable like any conventional pendant design lamp
- selectable lampshade size, colour and design
- software on basis of ›living surface‹ – market-leading in the area of interactive surfaces
