

paint2life

make your paintings come alive

›paint2life‹

Welcome to the wonderful world of ›paint2life‹ where paintings come to life and the boundaries between reality and the virtual world blur. Coloring our funny sea animals, little artists can demonstrate their unlimited creativity. Then, at the touch of a button, the paintings are sent to the life-sized virtual aquarium where they come to life. The creatures are able to move around and react to the kids. The children can play with and even feed them! The aquarium is available in various sizes and can be installed on walls, tables, counters, and floors.

coloring

The little artists choose one of the available animal motifs and color it the way they like. Funny stickers and glittery elements can also be used.

scanning

The scanning is super easy! Just put the coloring page onto the table; pushing the button then sends the fish into the aquarium's exciting underwater world. The kids can take their coloring page home as a souvenir.

bringing to life

After pushing the scanning button, the colorful fish appears in the aquarium. Accompanied by a flashy light animation, it greets the little artist. It then joins the other sea creatures and starts exploring its new home.

where

›paint2life‹ provides fun and entertainment for children in

- waiting areas of hospitals, medical practices and therapy centers
- indoor playgrounds, amusement parks, museums, zoos, aquariums and pools.
- shopping malls, furniture stores and shops
- luxury resorts, hotels and on cruise ships
- waiting areas in public facilities like administration offices or municipal services
- restaurants, food courts and airport lounges
...or as a temporary exhibition highlight

playing

Now the playing begins! The fish react to their little creators and follow their fingers. Colorful animations, joyful noises and charming little dances accompany the interaction.

4

printing*

As a souvenir, each artist receives a print-out of their fish with their name on it.

6

feeding

If the little artists want to feed their cute fish, they can either touch the treasure chest or scan the fish food from a piece of paper.

see the video and get astonished!

›paint2life‹

creativity displayed on wall, floor or table

›living floor‹

Entering the ›living floor‹ one feels like walking on the water of the aquarium. The fish react to the visitors' movements and try to escape or follow the footsteps.

›living floor‹ is projected directly onto the floor.

expanding options

Besides ›paint2life‹, there are many additional effects and more exciting games for kids available. Create your own interactive playlist or just switch effects and games whenever you feel like. Educational effects and advertisement are possible, too. Our standard package includes two effects besides the aquarium.

To find out more about the interactive games and effects available, please check our website:
www.vertigo-systems.com

›living wall‹

The ›living wall‹ invites anyone to playfully interact with the ›paint2life‹ fish. Our ›living wall‹ can consist of one big or multiple connected screens.

Another possibility is projecting the aquarium onto the wall.

›living table‹

›living table‹ brings any table to life. The picture can either be projected onto an existing table or displayed through a multi touch screen built into the table. The fish follow any movement on the table.
